

Tipping Cylinders

Gear Up for Grain Season – Keep Your Tippers Moving!

Harvest doesn't wait and neither should your equipment.

Upgrade your fleet with the **Hydreco S64, S65, and S66** Telescopic cylinders. Built for Australia's toughest, grain haulage conditions. Designed for reliable lifting performance and long service life, Hydreco telescopic cylinders help keep your trucks moving from paddock to silo with confidence.

- Engineered for demanding tipper applications
- Hard chrome-plated stages for maximum durability
- Premium sealing technology for dependable performance
- Increased stability and longer service life
- Designed and proven in Australia conditions
- Improved stock holdings across Australia for faster delivery and reduced downtime

Don't let hydraulic downtime slow your harvest.

With increased Hydreco cylinder inventory available nationwide, now is the time to secure what you need and stay ahead of peak-season demand.

Contact your local Hydreco distributor for expert advice and the ideal solution for your application.
